

Illumina's Climate Change Position Statement

Illumina's Corporate Social Responsibility vision is to deepen our impact on human health by serving as a champion for patients, the community, and our planet.

- Illumina recognizes the risk posed by global climate change.
- Illumina supports the conclusions of international frameworks that address climate change and the conclusions from the Intergovernmental Panel on Climate Change (IPCC).
- We acknowledge the need to keep the global temperature rise to well below 2 degrees Celsius to avoid consequences to human health and wellbeing.
- We support implementation of the United Nations Sustainable Development Goal 13: Take urgent action to combat climate change and its impacts.
- We endorse the use of scientific consensus and science-based targets to address carbon emissions reduction efforts.

We believe all governments and businesses have important roles and responsibilities to address the issue of Climate Change, and we will continue to seek opportunities to do our part to achieve this critical goal.

Illumina has set targets associated with emission reduction, increased renewable energy use, water conservation, landfill waste diversion, green design in new construction, integrating sustainability into new product design, and influencing our supply chain. We are committed to measuring our progress and reporting to stakeholders in a timely and transparent way through our annual Corporate Social Responsibility Report.

At Illumina, we are committed to safeguarding, sustaining and improving the environment for the benefit of current and future generations.
